

The Radio Station K-LOVE heard in my area on 90.7FM Radio serves me and the surrounding community very well. It is one of very few family oriented programming available on the radio, and its message and music type are the only one of its kind available in my area.

If K-LOVE were displaced by an LPFM, there would be no other radio station with the Christian music and quality programming with high moral standards available in my city.

The programming provided by K-LOVE is in the public's best interest because most of the other radio stations promote music and messages that deteriorate the common moral and ethical standards held by our society today. K-LOVE broadcasting should remain a priority over LPFM stations because no other stations like K-LOVE are available.

I would in fact be in favor of increasing the K-LOVE broadcasting range since weather and other stations already make it difficult to get a clear signal.
